

pitt L13 — note template

Lecture note template

Fill-in template — not completed notes and not an answer key.

Settings: more filled in · large text · diagrams on · code blocks on

How to use this sheet

Use the headings as a lecture outline. Write in the blanks during class. This preview was built locally without the language model; a later pass will turn the extracted slides into a richer template.

Cues from the first slide

Capture these ideas in your own words. Do not treat this as a solution.

- IS12 - Introduction to Programming _____
- Lecture 13: Conditionals _____
- Peter Brusilovsky _____
- <http://www2.sis.pitt.edu/~peterb/0012-051/> _____
- Course Logistics _____
- I We are at a turning point _____

1 IS12 - Introduction to Programming

Key idea:

Why it matters:

Question to ask in lecture:

Picture: IS12 - Introduction to Programming

Sketch the idea. Label the parts. Leave it unfinished if needed.

Code:

```
// Skeleton only --- fill in during lecture, do not paste a solution  
-----  
-----
```

2 Lecture 13: Conditionals

Key idea:

Why it matters:

Question to ask in lecture:

Picture: Lecture 13: Conditionals

Sketch the idea. Label the parts. Leave it unfinished if needed.

Code:

```
// Skeleton only --- fill in during lecture, do not paste a solution  
-----  
-----
```

3 Peter Brusilovsky

Key idea:

Why it matters:

Question to ask in lecture:

Picture: Peter Brusilovsky

Sketch the idea. Label the parts. Leave it unfinished if needed.

Code:

```
// Skeleton only --- fill in during lecture, do not paste a solution  
-----  
-----
```

4 Course Logistics

Key idea:

Why it matters:

Question to ask in lecture:

Picture: Course Logistics

Sketch the idea. Label the parts. Leave it unfinished if needed.

Code:

```
// Skeleton only --- fill in during lecture, do not paste a solution  
-----  
-----
```

5 I We are at a turning point

Key idea:

Why it matters:

Question to ask in lecture:

Picture: I We are at a turning point

Sketch the idea. Label the parts. Leave it unfinished if needed.

Code:

```
// Skeleton only --- fill in during lecture, do not paste a solution  
-----  
-----
```

6 I We have got through C basics and

Key idea:

Why it matters:

Question to ask in lecture:

Picture: I We have got through C basics and

Sketch the idea. Label the parts. Leave it unfinished if needed.

Code:

```
// Skeleton only --- fill in during lecture, do not paste a solution  
-----  
-----
```

7 programs are getting complicated

Key idea:

Why it matters:

Question to ask in lecture:

Picture: programs are getting complicated

Sketch the idea. Label the parts. Leave it unfinished if needed.

Code:

```
// Skeleton only --- fill in during lecture, do not paste a solution  
-----  
-----
```

8 – Are you able to follow?

Key idea:

Why it matters:

Question to ask in lecture:

Picture: – Are you able to follow?

Sketch the idea. Label the parts. Leave it unfinished if needed.

Code:

```
// Skeleton only --- fill in during lecture, do not paste a solution  
-----  
-----
```

Phrases to unpack

- IS12 - Introduction to Programming — _____
- Lecture 13: Conditionals — _____
- Peter Brusilovsky — _____
- <http://www2.sis.pitt.edu/~peterb/0012-051/> — _____
- Course Logistics — _____
- I We are at a turning point — _____
- I We have got through C basics and — _____
- programs are getting complicated — _____

This template may not cover every topic from the source slides.
