

pitt is12 lecture 13 — note template

Lecture note template

Fill-in template — not completed notes and not an answer key.

Settings: more blank · large text · diagrams on · code blocks off

How to use this sheet

Use the headings as a lecture outline. Write in the blanks during class. This preview was built locally without the language model; a later pass will turn the extracted slides into a richer template.

Cues from the first slide

Capture these ideas in your own words. Do not treat this as a solution.

- IS12 - Introduction to Programming _____
- Lecture 13: Conditionals _____
- Peter Brusilovsky _____
- <http://www2.sis.pitt.edu/~peterb/0012-051/> _____
